

**AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph at lines 16-24 of page 10 (corresponding to paragraph [0045] of US Patent Application Publication No. US 2005/0243190 A1) with the following amended paragraph:

A contents-transmission apparatus 50 accumulates contents-data DC supplied from the editing apparatus 30 . Further, if receiving a request for contents-data from, for example, a contents-reproduction apparatus 70 , it adjusts a frame rate of the contents-data in accordance with a band of a transmission channel 60 , generates transmit data  $[[DTc]] \underline{DTz}$  based on the contents-data after being adjusted in terms of frame rate, and supplies this transmit data  $[[DTc]] \underline{DTz}$  to the contents-reproduction apparatus 70 via the wireline or wireless transmission channel 60.

Please replace the paragraph at page 10, line 25 through page 11, line 2 (corresponding to paragraph [0046] of US Patent Application Publication No. US 2005/0243190 A1) with the following amended paragraph:

The contents-reproduction apparatus 70 generates an image signal Svz or an audio signal Saz of the contents based on the transmit data  $[[DTc]] \underline{DTz}$  supplied via the transmission channel and supplies it to a contents-presentation apparatus 80 . Further, the contents-reproduction apparatus 70 controls reproduction operation of the contents based on the accessory information.
